

B

BPE (Byte Pair Encoding)

Input SELFIES string

[C] [C] [Branch1] [C] [=O] [N] [c] [=C] [c] [c] [c] ...

BPE merges (example)

[C][C]][Branch 1][C] [=O][N][c] [=C][c]] ...

C

APE (Atom Pair Encoding)

Step 1: start from primitive SELFIES tokens

[C] [C] [Branch1] [C] [=O] [N] [c] [=C] [c] [c] [c] ...

Step 2: merge adjacent tokens into frequent fragments (examples)

[C][C] [Branch1][C] [=O][N] [c][=C][c] [c] ...
